

Space- draw the planets in our solar system and name them. Which is your favourite and why?

Find out five facts about Space. Please use google or books you may have at home. Which is the closest planet to the sun? Which has the most moons? Which is the smallest planet? Etc

Build/make a rocket using junk modelling.

Youtube- space songs. Sing along and learn! The Solar System song is my personal favourite.
Peppa Pig- blasts into Space.
Cbeebies- Space Adventures

Priestley Primary School
Home Learning
during School Closures

Writing- If you could take 5 things to space with you, what would they be? Write a list of important things/equipment. Use your sound mat in your book bag to help you segment and blend the words.

Maths- use Twinkl sheet or draw 10 stars with different numbers on them from 0-20.

Children roll a dice and add 2 numbers together before colouring in the answer. If you don't have a dice, make one

or use a coin. Flip the coin and colour odd numbers 1 colour (tails) and even numbers another colour (heads).

Explore space and develop your understanding of the world.

Use paper plates to create your own alien/space ship.

Bake some space biscuits with a grown up. Could you cut them into a rocket shape, an alien shape or a star shape?
