

Priestley Primary School

Parents & Carers Privacy Notice

(How we use pupil information)

Under data protection law, individuals have a right to be informed about how the school uses any personal data that we hold about them. We comply with this right by providing 'privacy notices' (sometimes called 'fair processing notices') to individuals where we are processing their personal data.

This privacy notice explains how we collect, store and use personal data about pupils.

We, Priestley Primary School, Prince Charles Drive, Calne, SN11 8TG, are the 'data controller' for the purposes of data protection law.

Our Data Protection Officer (DPO) is: Mr Ashley Martin, Headteacher, Heddington Primary school.

- Assess the quality of our services
- Administer admissions waiting lists

- to comply with the law regarding data sharing

Our legal basis for using this data

We only collect and use pupils' personal data when the law allows us to. We collect and use pupil information under Section 537A of the Education Act 1996. The collection and processing of data is lawful under Article 6 of the General Data Protection Regulation (GDPR) as the data subject has given consent to the processing of his or her personal data for one or more specific purposes and the processing is necessary for compliance with a legal obligation to which the controller is subject. The collection and processing of personal data revealing racial or ethnic origin, religious beliefs and data concerning health, is lawful under Article 9 of the GDPR as the data subject has given explicit consent to the processing of those personal data for one or more specified purposes.

Most commonly, we process it where:

- We need to comply with a legal obligation
- We need it to perform an official task in the public interest

Less commonly, we may also process pupils' personal data in situations where:

- We have obtained consent to use it in a certain way
- We need to protect the individual's vital interests (or someone else's interests)

Where we have obtained consent to use pupils' personal data, this consent can be withdrawn at any time. We will make this clear when we ask for consent and explain how consent can be withdrawn.

Some of the reasons listed above for collecting and using pupils' personal data overlap, and there may be several grounds which justify our use of this data.

Collecting pupil information

While the majority of information we collect about pupils is mandatory, there is some information that can be provided voluntarily.

Whenever we seek to collect information from you or your child, we make it clear whether providing it is mandatory or optional. If it is mandatory, we will explain the possible consequences of not complying.

How we store this data

We keep personal information about pupils while they are attending our school. We may also keep it beyond their attendance at our school if this is necessary in order to comply with our legal obligations. Our retention of documents policy sets out how long we keep information about pupils and this can be found on our school website

The National Pupil Database (NPD)

The NPD is owned and managed by the Department for Education and contains information about pupils in schools in England. It provides invaluable evidence on educational performance to inform independent research, as well as studies commissioned by the Department. It is held in electronic format for statistical purposes. This information is securely collected from a range of sources including schools, local authorities and awarding bodies.

We are required by law, to provide information about our pupils to the DfE as part of statutory data collections such as the school census and early years' census. Some of this information is then stored in the NPD. The law that allows this is the Education (Information About Individual Pupils) (England) Regulations 2013.

The DfE may share information from the NPD with other organisations which promote children's education or wellbeing in England. Such organisations must agree to strict terms and conditions about how they will use the data.
